Create flask project

Flask App:

The screenshot shows the Visual Studio Code interface with a Flask application named 'app.py' open. The Explorer sidebar on the left shows the project structure, including a 'Docker' folder and a 'Dockerfile'. The main editor displays the code for 'app.py', which is a simple Flask application. The terminal at the bottom shows the command prompt 'PS D:\Backup\IBM>'.

```
1 from flask import Flask
2 helloworld = Flask(__name__)
3
4 @helloworld.route('/')
5 def run():
6     return "hello word"
7
8 if __name__ == '__main__':
9     helloworld.run(host='0.0.0.0', port=int("5000"), debug=True)
```

Terminal output:

```
PS D:\Backup\IBM>
```

Running Flask App
